PROFESSIONAL PROFILE

Senior Frontend Engineer with over a decade of experience developing web applications, combining hands-on software development, frontend architecture and technical leadership. Strong expertise in React, TypeScript and modern JavaScript, with extensive experience building reusable components, design systems and maintainable web products.

Experienced in collaborating with Product, Design and Backend teams to translate requirements into production-ready features, improving code quality through automated testing and contributing to architectural decisions across engineering teams.

CORE SKILLS

FRONTEND DEVELOPMENT
React • TypeScript • JavaScript ESNext • Next.js • Redux Toolkit • Zustand • TanStack Query • SASS/SCSS • HTML5 • CSS3 • Web Components • Tailwind CSS • Vite

PRODUCT & UI ARCHITECTURE
Frontend architecture • Design systems • Component libraries • REST API integration • UX/UI collaboration • Responsive interfaces • Reusable patterns • Cross-team engineering standards

QUALITY & DELIVERY
Jest • Vitest • Playwright • Cypress • Unit and E2E testing • CI/CD • Refactoring • Web performance • Debugging • Code reviews • Maintainable code • Agile development

AI-ASSISTED ENGINEERING
Claude • Model Context Protocol (MCP) • AI-assisted development workflows • Prompt engineering • Custom skills

BACKEND & DATA
Node.js • TypeScript • Fastify • Drizzle ORM • REST APIs • Java • Spring • Hibernate • Python • Django • Oracle • MySQL • SQL Server

PROFESSIONAL EXPERIENCE

GoStudent - Senior Frontend Engineer - Product Engineering Lead

Aug 2022 - Aug 2026 | Madrid, Spain | Online tutoring edtech company

- Led and mentored a team of four engineers, contributing hands-on in React and TypeScript and representing frontend on the technical committee for cross-team architectural decisions.
- Developed and maintained React/Next.js applications using App Router, Pages Router, API Routes, SSR and SSG; used TanStack Query for server state across two portals.
- Designed and evolved shared frontend architecture and approximately 20 reusable design-system components adopted by three engineering teams, replacing duplicate implementations.
- Led technical debt reduction across the frontend by defining coding standards, reusable patterns and maintainability practices.
- Improved code quality through Jest, Vitest, Playwright, code reviews and CI/CD, with targeted rendering and lazy-loading optimizations.
- Partnered with Product, Design and Backend teams to translate requirements into scalable, consistent and user-focused frontend solutions.

Docucom - Senior Frontend Engineer - Team Lead

Nov 2019 - Jul 2022 | Madrid, Spain

- Led and mentored a four-engineer frontend team, combining technical coordination, code reviews and hands-on development.
- Led two successive migrations, from Vaadin to Angular and then to HTML5 Web Components, defining target architecture and component strategy.
- Designed reusable UI components and frontend standards to improve product consistency, maintainability and scalability.
- Introduced Jest unit testing and a structured code review process during major architectural transitions.

Banco de España - Software Engineer

Feb 2017 - Oct 2019 | Madrid, Spain

- Built full-stack enterprise applications with HTML5/Angular, Java/Spring/Hibernate and Oracle Exadata.
- Designed and implemented business features and frontend-backend integrations for institutional applications.
- Developed and released Android and iOS applications using Ionic 3 and Cordova.
- Contributed to architecture, testing, maintenance, issue resolution and requirements analysis with technical and business stakeholders.

Natoora - Software Engineer

Feb 2015 - Dec 2016 | London, United Kingdom

- Developed full-stack products using HTML5, JavaScript and AngularJS, with a backend initially in Java and later in Python/Django.
- Designed and maintained MySQL databases and integrated frontend, backend and persistence layers for new features.
- Introduced unit testing and developed Cordova mobile applications for Android and iOS.
- Owned features end to end, from requirements and technical design through implementation, testing, deployment and maintenance.

FEATURED PROJECT

Full-stack ticketing platform - independent project

2026 | React, TypeScript, Vite, Fastify, Drizzle ORM, PostgreSQL, Playwright

- Developed a React/TypeScript ticketing platform with events, performances, interactive seat selection, authentication, checkout and order confirmation.
- Implemented concurrency-safe seat reservations, server-side price validation and atomic order transactions for consistent checkout.
- Built a modular layered Fastify backend separating API routing, domain logic, repositories and persistence (Drizzle/PostgreSQL).
- Added unit and Playwright E2E tests to validate the complete purchase journey.

EARLIER EXPERIENCE

MediaMarktSaturn - Programmer Analyst | Apr 2014 - Dec 2014 | Barcelona, Spain
Java enterprise applications, functional analysis, Microsoft SQL Server and unit testing.

atSistemas - Programmer Analyst | Nov 2013 - Apr 2014 | Barcelona, Spain
Java/Liferay web applications, portals, intranets and technical requirements analysis.

TECNOY - Junior Developer | Oct 2012 - Nov 2013 | Spain
Web intranets and MVC-based ATM software for Rural Informatic Services.

Universidad Rey Juan Carlos - Junior Developer | Oct 2011 - Aug 2012 | Madrid, Spain
Android development, MySQL databases and a web application for Leganés City Council.

EDUCATION

Universidad Rey Juan Carlos | Technical Engineering in Computer Science (Management) | Sep 2007 - Jun 2011

CERTIFICATIONS & CONTINUING EDUCATION

Anthropic - Building with the Claude API • Claude Code in Action • Introduction to Agent Skills • Introduction to Model Context Protocol

LANGUAGES

Spanish - Native • English - Advanced professional proficiency
